

Public Lecture - Space Exploration: reaching beyond the limits using bioinspired technologies

Thursday, June 6, 2024 7:00 PM (1 hour)

Space Exploration is one of the key elements of the new Space Economy. To explore space, however, a number of challenges should be addressed and resolved. Nature is a source of a never ending inspiration for bio inspired solutions to address the needs of human and robotic exploration.

Presenter: BATTISTON, Roberto (Università di Trento)
